

EDUCATION COMMITTEE CHARTER

2003

PURPOSE

Education has a central and distinctive role in our career development in the Federal Government. Education provides the basic intellectual tools and habits for effective training, competent job performance, and professional growth. Education is dynamic and is the necessary condition for training for the accelerating pace of change in the workforce.

Acquisition professionals are at the front of the transformation march. That is why we are continuously being empowered to look for and adopt smarter ways of doing business. If we are to continue to develop, procure, and deliver world-class products to our warfighters, a highly trained, well-educated, quality workforce is essential.

The purpose of this committee is to coordinate the Council's efforts to keep members abreast of changes that affect our small business advocacy functions.

IMPLEMENTATION

Educational opportunities will be made available to Council members at least three times a year.
